Melani Triana

Computer Science and FinTech @ NJIT | Seeking SWE Internships
Wallington, New Jersey, United States

Summary

I'm a developer with a strong passion for application development
and a growing interest in machine learning. Recently, I've been
diving into hands-on machine learning projects to deepen my
understanding of AI and its applications, and I'm excited about the
possibilities this field brings to problem-solving.

I thrive on building efficient and robust back-end systems while
creating intuitive, visually appealing front-end experiences. The
process of turning ideas into functional and impactful solutions is
what inspires me every day.

Outside of development, I'm a big basketball and soccer fan, enjoy
staying active through workouts, and love traveling to experience
new cultures and perspectives.

Feel free to reach out,

Melani
